LOCATION

Lisbon, Portugal

EXPERIENCE

2024-03 – present

Software Engineer

Meridian Software

- Built the customer-facing billing dashboard in React and Node, used by 4,000 accounts.
- Cut median API response time from 800ms to 180ms by adding covering indexes and removing N+1 queries.

2023-01 – 2024-02

Junior Developer

Hollow Pine Studio

- Shipped twelve client marketing sites on a shared component library.
- Automated the deploy pipeline, taking a release from forty minutes of manual steps to one command.

PROJECTS

Ledgerline

Side project

- A double-entry bookkeeping API with zero runtime dependencies.
